Superior Infection Control with IC+

Proprietary to healthcentric, IC+™ Upholstery Solution* is a breakthrough upholstery technology specifically formulated for the healthcare industry to provide the most durable, cleanable and impermeable medical-grade surface available.

Pathogens, fluids and bed bugs stay out because IC+ is non-porous, seamless and forms a completely sealed moisture-free barrier that makes microbial growth virtually non-existent. IC+ is strong enough to stand up to all hospital-grade cleaners and disinfectants, allowing cleaning staff to effectively remove the toughest pathogens from the surface of the chairs in high traffic patient areas.

+ Puncture and tear resistant

IC+ resists tears, punctures and general abuse that furniture takes in most high traffic facilities. In puncture and tear tests, IC+ proved to be up to 10 times more durable than hospital-grade vinyl.

+ Sealed and seamless

IC+ is non-porous, and has an impermeable structure that forms a strong barrier against fluids, dirt, bed bugs and pathogens to provide the ultimate infection control surface.

+ Superior cleanability

Our unique patented under-seat clip system allows for easy and thorough cleaning and disinfecting – no tools required.

+ Hospital-grade cleaning agent tough

IC+ has been formulated to withstand the most common hospital-grade cleaning and disinfecting agents such as Rescue, CaviCide, Wex-Cide, Virox 5 and bleach.

+ No off-gassing – GREENGUARD® certified

PVC- and latex-free and low VOC's means healthier indoor environments for staff, patients and visitors.

+ Exceeds 1,000,000 double rubs

IC+ offers a high abrasion rating and is available in a wide variety of colors that seamlessly blend into any healthcare environment.

+ 10 year warranty

IC+ protects your investment and helps stretch budget dollars with a 10 year guarantee against tears, punctures and cracks.

+ CAL 133 compliant
